# Semi XML project summary report

## Preface

This report is a summary of all tests done for the project SemiXML.

## Testing the basic use of SemiXML

Purpose of this report is that it tests the parsing and translating process of the several parts of the language. Here only the simple structures are tested and not the methods to generate new content.

The tests comprises the following chapters

- Generate a simple element
- Add attributes.
- Nested elements.
- Element blocks and their different types.

**Tested on 2018-02-21 14:17:13 (zulu), on fedora 26, linux, 4.14.18.200.fc.26.x.86._.64**
**All tests are 100% successful**

## Configuration metrics

TODO: Tests for 'configuration' must be designed and run

## Sigils metrics

TODO: Tests for 'sigils' must be designed and run

## Core-module metrics

TODO: Tests for 'core-module' must be designed and run

## Testing the module LoremIpsum

Purpose of this report is to test the module LoremIpsum. The module is ment to generate text as a temporary fill of elements. This can help to have an impression of a page without being extracted by content.

The tests comprises the following chapters

- Setup usage of module
- Method standard1500
- Method cicero45bc

**Tested on 2018-02-26 09:00:12 (zulu), on fedora 26, linux, 4.14.18.200.fc.26.x.86._.64**

| Chapter | Success | Fail | Todo | Skipped |
|---|---|---|---|---|
| **Setup usage of module** | 2 | 0 | 0 | 0 |
| **Method standard1500** | 2 | 0 | 0 | 0 |
| **Method cicero45bc** | TODO: Tests must be designed | | | |
| **Total number of tests: 4** | **100.00 %** | **0.00 %** | **0.00 %** | **0.00 %** |

## Documentation metrics

TODO: Tests for 'documentation' must be designed and run

## Conclusion

And here we are at the end of it all.

Lots to do now but lets not give up hope and struggle on.
